

# The Proliferation of Artificial Intelligence

## Will AI Be the Biggest Disruption in the Next 10 Years?

Evolutionary disruptions in machine learning, deep learning, and artificial intelligence are ushering a new age of “intelligent enterprise,” creating unprecedented opportunities for both startups and established companies. Gartner projects that the value of AI-derived businesses will reach \$3.9 trillion in 2022.

From home automation to self-driving cars, cognitive learning and AI have the potential to be the most disruptive class of technologies during the next 10 years. Driven by increasingly powerful computational capabilities and new advances in context-based learning, the implications are huge — for business, for entire industries, and for society as a whole.

In this event, our panelists will explore how enterprises are reinventing business processes, workflows, and customer services..

- Will AI live up to its expectations?
- What are the requirements for true cognitive learning?
- How can businesses leverage the latest advances in AI?

Join us on June 19 to find out.

### Moderator

Mariya Yao  
Editor-in-Chief,  
TOPBOTS

### Panelists

Patrick Ehlen  
Chief Scientist, Loop AI Labs

SriSathish Ambati  
CEO and Co-Founder, H2O.ai

Shubho Sengupta  
Facebook AI Research (FAIR)

Jishnu Bhattacharjee  
Managing Partner,  
Nexus Venture Partners

---

### Tuesday, June 19, 2018

6:00 pm – 8:30 pm

6:00 pm:

Reception and demos

7:00 pm:

Panel discussion (with Q&A)

### Stanford Faculty Club

Stanford University  
439 Lagunita Drive  
Stanford, CA 94305
